SUMMARY

Software Engineer with 4+ years of experience building scalable full-stack applications and enterprise data platforms. Experienced across React, Node.js, TypeScript, Oracle, distributed backend systems and performance optimization with strong foundations in DSA, System Design and scalable software architecture.

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, PHP, C++

Frontend: React.js, Redux Toolkit, MUI, Firebase, WebSockets, React Dev Tools, Unit Testing

Backend & Database: Node.js, Express.js, REST APIs, MongoDB, MySQL, Oracle PL/SQL, Passport.js, JWT, OAuth2

Tools & DevOps: Git, Docker, AWS, GitHub Actions, CI/CD, Power BI, Postman, Jira, VS Code, Agile, DSA, System Design

Certifications: [MERN Dev \(Udemy\)](#) | [AI Fundamentals \(MS\)](#) | [JS, SQL & DBMS \(Scaler\)](#) | [Sys Design HLD/LLD \(Scaler\)](#) | [Data Engg \(Skillsoft\)](#) | [Databricks DE Prof. & Assoc.](#) | [Python for DS \(IBM\)](#) | [Cloud Essentials \(IBM\)](#) | [OCI Foundations Associate](#)

EXPERIENCE

Software Engineer / MERN Full Stack Developer, UnisonTech Consulting (Formerly RiskInsight)  Hyderabad

Aug 2025 – Present 

Tech Stack: React.js, TypeScript, MERN, Node.js, REST API, Component Architecture, Passport OAuth2

- Architected a **React-based HR portal** for an enterprise client using **reusable, system-design-driven component architecture**, improving maintainability across modules.
- Built end-to-end features across the **MERN stack** (MongoDB, Express.js, React.js, Node.js), integrating REST APIs with Passport-based OAuth2 authentication for secure role-based access.
- Applied **system design principles** — modular service boundaries, loose coupling, and horizontally scalable state management — to keep the portal extensible as new HR modules were added.
- Reduced unnecessary re-renders using **memoization and lazy loading**, improving render performance by **~40%** and cutting perceived load time.
- Optimized **API consumption** and frontend data normalization, cutting redundant network calls by **~30%**; enhanced dashboard and role-based access interactions, improving cross-role usability by **~25%**.

Software Engineer, Innova Solutions  Hyderabad

Jun 2022 – Jul 2025 

Tech Stack: Talend, Oracle ADWC, PL/SQL, Data Warehousing, React, Power BI, ETL, Docker, AWS, WebSockets

- Built **metadata-driven ETL pipelines** ingesting **5K+ weekly records** from **15+ job boards** into **Oracle ADWC**, enabling scalable, reusable data ingestion.
- Improved load efficiency by **35%** through optimized **Talend** transformation logic.
- Designed **star-schema data models** and a scalable, fault-tolerant system architecture for the warehouse, optimizing **PL/SQL procedures** to improve query performance by **20%** and cut reporting turnaround time by **50%** via interactive **Power BI** dashboards.
- Built a **React-based Excel-to-ADWC ingestion UI** where a single file upload auto-triggers **Talend ETL, Power Automate, and Power BI dataset refresh** end-to-end.
- Integrated **Oracle Fusion, EBS, and Bullhorn** systems into a unified reporting model, consolidating data from **3 disparate sources**.

React Developer Intern, CloudWorks PVT LTD.  Remote

Apr 2021 – Jul 2021 

Tech Stack: React, Redux, Node.js, API Optimization

- Built modular **React UI components** for ordering and amenities management, following reusable design patterns.
- Implemented **infinite scroll** using React to improve data loading efficiency on high-volume list views.
- Optimized **Redux state handling and API dispatch control**, reducing redundant renders and improving page response performance by **30%**.

PROJECTS

Apni Dukan  [Code Repository](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, RabbitMQ, Razorpay, Google OAuth 2.0, JWT, Cloudinary, React-Leaflet

- Architected a stable **5-service microservices system** (Auth, Shop, Rider, Realtime, Utils) with independent deployability, minimizing service coupling.
- Engineered real-time order tracking and chat using **Socket.io WebSockets**, maintaining sub-100ms synchronization latency across services.
- Secured endpoints with **Google OAuth 2.0 and JWT-based stateless authorization** across distributed services.
- Offloaded system traffic via **RabbitMQ** async messaging and a distributed **Cloudinary CDN** pipeline; reduced redundant API calls by **60%** via search debouncing, resolved async race conditions, and integrated **React-Leaflet** for real-time shop discovery.
- Implemented **Razorpay payment gateway** with an idempotent, event-driven confirmation flow via a **RabbitMQ** consumer, atomically updating order status and clearing the cart post-payment.

Real Estate Marketplace  [Code Repository](#)

Tech Stack: MERN, MongoDB, Express.js, React.js, Node.js, Redux Toolkit, JWT, Google OAuth, Cloudinary, Render

- Developed a secure full-stack property marketplace with **JWT authentication and Google OAuth**, supporting seamless multi-role user access control.
- Designed **indexed MongoDB schemas** and query patterns, improving retrieval performance and backend scalability.
- Reduced API latency through **pagination and query optimization** for large-scale listing data; integrated **Cloudinary** and deployed via environment-based config on Render for production stability.

Memories App  [Code Repository](#)

Tech Stack: MERN, MongoDB, Express.js, React.js, Node.js, Redux Toolkit

- Built a full **CRUD social sharing platform** with a scalable NoSQL schema design; centralized state management using **Redux Toolkit**.
- Enhanced frontend performance through **normalized API responses**, minimizing redundant re-fetches and unnecessary UI refresh cycles.

Web Mall  [Code Repository](#)

Tech Stack: PHP (OOP), phpMyAdmin, MySQL, SQL Indexing, HTML, CSS, JavaScript, Bootstrap

- Developed an OOP-based PHP e-commerce platform with **normalized MySQL schemas (3NF)** and **SQL indexing** on search-heavy columns; deployed on **InfinityFree** with optimized execution plans, reducing page load time.

EDUCATION

Medi-Caps University  Indore — B.Tech, Computer Science

Aug 2018 – May 2022 

CGPA: 7.81/10

A.B.N. Se Sec School  Indore

Higher Secondary 12th (Apr 2017 – Mar 2018): CGPA 7.00/10 | Senior Secondary 10th (Apr 2015 – Mar 2016): CGPA 9.00/10

ACHIEVEMENTS

Innova Solutions:

- Honored with the Innova Champion 2024 (top organizational award).
- Awarded Emerging Player & High Five in consecutive months.

Competitive Coding:

- GeeksforGeeks: Rank 1/1500. CodingNinjas: Level 7, 23,050+ pts. CodeChef: 3★, peak 1760. HackWithInfy 2022 Top 100/7000+. Brain of MP — Dainik Bhaskar '18.
